Quad Blaster QB4

Prepare to repel the birds ultrasonically

BIRDS CAUSE:

- Damage to Property
- OHS issues
- Wasted Maintenance Dollars
- Risk of Disease
- Unsightly Messes
- Unsafe Conditions
- Public Relations Nightmares
- Ruined Product
- Regulatory Issues
- Customer Concerns

QB4 the UNIVERSAL SOLUTION MOST BIRDS, ANY PLACE

- Repels **MOST SPECIES OF birds** inside buildings either *enclosed or semi-enclosed areas, can be used as a CONTROL BOX with 4 extension speakers externally as long as QB4 is out of the weather*
- Pigeons, sparrows, starlings, swallows, gulls, blackbirds, crows and most pest birds.
- As a bonus the QB4 also works on **RODENTS plus bats, insects and spiders.**
- Ideal when used in Hangars, warehouses, plants, tunnels plus loading docks, railroad sidings, breezeways, boat houses, underpasses, storage sheds, barns, sports arenas, convention centers, parking garages, car washes (not water proof so protect from direct spray).
- 4 inbuilt speakers allow 360° **COVERAGE**, extension speakers can be used to allow the QB4 emissions to get up close and personal to roosting birds, allows the installer to place speakers in difficult places such as behind partitions or parapet walls.
- Inbuilt Four speakers emit Ultrasonic sounds in a fan shape pattern and the desired installation is to have sufficient units so that the fan shaped emissions overlap or sufficient units protect the perimeter of the building
- Consult the experts on how many QB4s are required for your application, insufficient units will not repel the birds, experience has shown that a sufficient number correctly installed gives an excellent outcome.
- Optional accessory for unusual space configurations or areas divided by walls up to four *remote* speakers stretch sound further, these extension speakers replace the built-in ones, but allow the installer to take the extension speakers on 30 metres of cable external to the building of required or over doorways and behind partition walls.
- QB4 can be mounted Mounts in any direction, on any surface, a beam, the rafters, the ceiling, a wall, wherever the birds are roosting
- Works high in the building above the employees heads and directly pointed at the roosting birds.

* With optional Strobe

SPECIFICATIONS

- Dimensions: QB-4 300mm x 300mm x 100mm
- Coverage: Up to 600 sqm.
- Power: 12 VDC
- Power Consumption: Less than 10 watts
- Output: Range: 20–30 kHz; 112 dB at 1 metre at 22kHz
- Strobe Flash Rate: 60 triple pulse flashes per minute
